Leanne Caret

VP H-47 Programs

About our speaker ...

Leanne Caret is the vice president, H-47 Programs for The Boeing Company. In this position, she is responsible for overall management and direction of the H-47 program with annual revenue of \$2 billion. She leads the production and modernization efforts for the U.S. Army and Special Operations Forces Chinook programs, which include the CH-47F and MH-47G.

In addition, Leanne directs activities for international programs in 18 countries operating Chinooks. She is responsible for a world-wide team of 1,700 employees along with an international network of suppliers and partners supporting the H-47 program.

Previously, Leanne was general manager, Global Transport & Executive Systems. In this position she managed development, modification and support of military and head of state variants for the U.S. Air Force and international customers, including those that support the President of the United States.

Leanne joined Boeing in 1988 and holds a Bachelor's degree in Accounting from Kansas State University and a Master's degree in Business Administration from Wichita State University. In addition, she has earned certifications from Harvard University in the Program for Leadership Development and the International Security Defense Program, as well as completing the Integral Leadership Program at the University of Notre Dame.

In addition to being a member of the American Helicopter Society and Women in Aviation International, Leanne is also active in a wide range of community based and local business groups. She was previously a Board Member and Chair-Elect of the Special

Olympics of Kansas and is currently on the National Executive Board of the Army Aviation Association of America, as well as a Board Member of Liberty USO, Philadelphia and the Urban League, Philadelphia.

About our sponsor....

BAE Systems is a global defense and security company with approximately 100,000 employees worldwide. The Company delivers a full range of products and services for air, land and naval forces, as well as advanced electronics, security, information technology solutions and support services. In 2010 BAE Systems reported sales of \$ 34.6 billion. Additional information is available at www.baesystems.com.

BAE Systems Platform Solutions is based in Johnson City, New York, Platform Solutions employs more than 4,200 people at 10 facilities worldwide. Platform Solutions serves the aerospace and defense community with capabilities and products that improve operational safety and enhance mission effectiveness.

The division supports a wide range of military and commercial platforms-including fixed- and rotary-wing aircraft, and ground vehicles-with capabilities in vehicle management, human-machine interface, and power management. Platform Solutions designs and produces fly-by-wire flight controls; full-authority digital engine controls; cockpit, head-up and helmet-mounted displays; autopilots, pilot sticks and inceptors; hybrid electric propulsion systems; vehicle power management systems; and data distribution and flight-deck systems.

Platform Solutions also is developing integrated capabilities for all-weather operation, power management, real time cockpit information, prognostics and health management, and air traffic management.
